

## Features

- Data**  Multiple information sources blended into a fused environment.
- Awareness**  Enhanced situational awareness in near real-time. Identification and alerting of dark shipping and spoofing activities.
- Alerts**  Monitor dynamic and real-time datasets, such as fleets of vessels for sanction & non-compliance.
- Focus**  Modular system that provides tools to ensure the platform is focused, and exactly meets your requirements.
- Tailored**  Geonius allows your proprietary data to be ingested and layered to give customised, holistic, enriched analytical insights.
- Multi-Use**  Specialist tools, designed by operators for operators, are included within Geonius for forensic investigations and hypothesising.
- Complete**  Authoritative, open source, commercial, proprietary, and customer datasets provide a holistic, unrivalled operational picture.

## Gain insights

Geonius is a proprietary, flexible, request-driven platform with off-the-shelf and customised tools, combined specifically to fulfil client requirements.

Geonius is backed by a team of dedicated data scientists, intelligence officers, and developers who can provide the guidance and expertise to produce the solution you require.

**Geonius is a fully automated tracking, alerting, and asset behaviour monitoring platform that enables users to quickly understand large volumes of data.**

We work with you to ensure our alerts reduce the burden on operators and provide actionable insights sooner.
