Experience

Geollect operates at the spearhead of advanced, technology driven investigations and intelligence reporting.

Our team of experts take a human-centered, data mastered approach, combining the expertise of military intelligence professionals and data scientists to achieve vital insights for decision making at industry-leading rates.

One billion USD saved in client claims
250% increase in cases answered 2022-2023

Our team has embedded intelligence operational experience within US and UK government and defence intelligence agencies, spanning five decades. Academics with advanced Geospatial data and intelligence analytic capabilities create a potent blend of tech-intelligence authority.

“Geollect provided us with invaluable insight and analysis in a high pressure international dispute. We gave them the difficult task of rebutting the opposing party’s satellite imagery expert, and the team delivered a superior product in every way. We relied on Geollect’s findings to develop many of the critical arguments in the case, and their imagery analysis played a central role at the hearing. Working with them could not have been better – they eagerly rolled up their sleeves and quickly became a key member of our team.” International Law Firm

We also provide evidence gathering/platform access for journalists and media outlets as well as undertaking specific investigations for multi-sector intelligence requirements.
