

Features

Overview

Platforms

GPaaS: Geospatial Platforms as a Service. Bespoke and off-the-shelf solutions and world class service harness the power of Big Data.

Space-Tech

Operating at the leading-edge of satellite imagery analysis, blended with disparate data sources in accessible web applications.

Action

Our products deliver actionable intelligence. World class assessments and analysis benefit of any government or military agency worldwide.

Edge

Organisation intelligence is about gaining an edge. It isn't about the amount of data you can collect, it is about the quality of connections you make.

Gaps

We back ourselves to find the gaps in the intelligence picture. Validating open source data, creating algorithms to discover correlations between disparate data.

Multi-Use

Specialist tools, designed by operators for operators, are included within our products for forensic investigations and hypothesising.

Complete

Authoritative, open source, commercial, proprietary, and customer datasets provide a holistic, unrivalled operational picture.

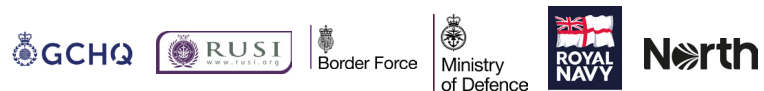

We are at the leading edge of a global, geospatial intelligence and outsourced professional intelligence revolution.

Our products change the way organisations think and communicate by blending multiple layers of data into one place. The accuracy of real-time information, pinpoint location certainty, investigations and machine learning offer insights and advanced foresights you won't get from anyone else, meaning our clients know where, know first and know more.

We help clients by illuminating options and enhancing validity in their moments of decision. Actions taken on behalf of clients are delivered with speed, accuracy and precision.

Our team has embedded intelligence operational experience within US and UK government and defence intelligence agencies, spanning five decades. Academics with advanced Geospatial data and intelligence analytic capabilities create a potent blend of tech-intelligence authority.

Geollect transforms historical and live data into action, so our clients know what is happening today and are prepared for tomorrow.
